EXPERIENCE

UX / UI Design Intern

InventCan - North York (2 months)

- Developed the design system for the website and mobile app resulting in a consistent platform.
- Produced mockups, high fidelity prototypes with interactive components on Figma to showcase look and flow of the product.
- Revised the website landing page to a trending design more related to the business niche.
- Conceptualized the user flow for placing an order through the website and collaboratively implemented the flow into the website with engineers creating a consistent framework for users to place an order.
- Illustrated logos for various other projects and designed visuals for marketing to create an appealing and brand aligned social media presence.

UX / UI Design Intern

Avybe - Remote (4 months)

- Researched and planned the user flow and designs for a NFT marketplace on a video streaming platform.
- Established a responsive flow on the website for users to learn about the company, access open positions, and apply for jobs.
- Discussed new concepts and possible errors or areas for improvement during daily meetings with project manager and other designers.

Freelance Swim Instructor

AquaMobile - GTA (4 months)

- Prepared structured lessons and observed the needs of each student for a seamless experience.
- Demonstrated various techniques, used progression exercises and clear instructions for significant improvements in swimming capabilities.
